

🚀 summary

Coder, Hacker, Developer.
I also write and give talks.

📌 experience

Individual Contractor	📍 Remote	Oct 2017 - Present
Geektrust	📍 Bangalore	Oct 2016 - Sep 2017
Pickcel	📍 Bangalore	Sep 2015 - Sep 2016

🛠️ skills

Frontend development :

- React, Gatsby
- Angular

Backend engineering :

- Node, Typescript
- Golang
- Java Spring

DevOps / SRE :

- Terraform, Ansible
- AWS, GCP, DO

💡 projects

[Doppler](#) - A zero configuration remote monitoring tool designed to be better than nothing.

[DiscordEncryption](#) - Configurable end to end encryption for Discord.

[arvind.io](#) - Source code for my blog and personal website.

[Botato](#) - A cross platform botnet client that makes remote management easy.

[JPL](#) - A ground up implementation of the Portable Lisp standard, intended to be minimal yet powerful.

🧪 open source

I have contributed to and maintained numerous open source projects throughout my career, including popular projects such as Gatsby, Terraform and DNSCrypt.

Refer to [my Github pull request history](#) for more details.

🏆 events
